(54) METHOD FOR NOTIFYING DATE SCHEDULE IN COMMUNICATION NETWORK

(57) Abstract:

PURPOSE: A method for notifying date schedule in a communication network is provided to offer date schedule information to a user by users information (birthday etc.) in the connection with SMS(Short Message Service). CONSTITUTION: When a user connects to a service, the service is connected to a data schedule user notice service server(411). The server searches users information from the date relation information database(412). By using the searched information, it is discriminated whether today is a special day(413). If today is a special day, a congratulation message corresponding to the day is outputted to the user through a communication network(414). If today is not a special day, date schedule information is outputted to the user through the communication network by using the searched information(415).
